Subject: Monitoring Report

Hey Chris,

Thanks again for walking us around today! Here is the post-site characterization monitoring report provided by Hurt and Proffitt that [redacted] was requesting.

While I was pulling the file, I came across a site that was the [redacted] **Nonresponsive based on revised scope** of the Shiloh Church Rd Site on L.P Bailey. The facility had a heating oil release that underwent remediation. The address listed for the site is [redacted] LP Bailey Memorial Hwy, Nathalie, VA 24577 and it's a small white building. I know it's pretty far south, but thought it might be of interest.

I'll let you know what owner/contact info I can find for the parcels across the street.

Thanks!
